Fraud Alert

The Row La- The Church Without Walls values the support of its donors, who give generously to help those in need. Unfortunately, criminals sometimes prey on that generosity. Keep in mind criminals may attempt fraudulent activities such as creating websites to look like the The Row La- The Church Without Walls site or any other site you may visit, in order to collect private information from those wanting to help our Communities in need. Other charities — as well as banks, corporations and even grandparents — have been targeted by similar schemes.

We want to protect our donors from such scams. Before you provide any information online, be sure you know it's The Row La- The Church Without Walls. Here are some tips you can use to protect yourself:

- The website for The Row La- The Church Without Walls is: www.therowchurch.com we have taken every step to ensure the privacy of our donor's private information.
- If you have any doubt, type www.therowchurch.com directly into your browser.
- If you have any questions, please email us at info@therowchurch.com
-

The Row La- The Church Without Walls Security Policy

All response forms requesting confidential information (such as credit card numbers) on The Row's website utilize the Internet security protocol known as "Secure Sockets Layer" or "SSL." This is a certification and encryption technology designed to make using your credit card as safe as possible on

the Internet.

Independent agencies report that, statistically speaking, using a credit card on the Internet through SSL is far safer than submitting your credit card to a clerk in the grocery store, or over an open telephone line. In fact, they report that there are no recorded instances of someone "breaking" SSL encryption and using credit card information stored therein for fraudulent purposes.

The SSL technology depends on secure Uniform Resource Locators (URLs), which are certified by a certifying authority. Secure URLs always begin with "https://" rather than "http://" and if you are using one from a browser that recognizes SSL, you will generally also receive a preceding message and/or see a symbol, such as a lock, that signifies that you are on a secure page. Any information you enter on such a page is encrypted at your browser, sent over the public Internet in encrypted form, then de-encrypted at our servers.

If your browser doesn't support SSL technology, you will receive an error message when trying to access our SSL page. Once we receive your credit card information, it is accessible only to a small number of trusted The Row La staff who have been specially trained in processing this information.
