STUDENTS SHOULDN'T HAVE TO PAY FOR GOVERNMENT CUTS!

- Children and youth will fall through the cracks with larger class sizes and less funding to education.
- Cuts to education will result in fewer teachers and education workers and fewer resources to meet the diverse needs of students.
- Cuts to education mean fewer supports for special education, less money to fix buildings, and the potential closing of community schools.
- Possible changes to the teacher and ECE model of Full-day Kindergarten would take away a great start from Ontario's youngest students.
- Mandatory e-learning for high school students reduces access to education.
