

Senior Mobility Report

> Lincoln Heights

## A Partnership Between:

# Lincoln Heights Neighborhood Association

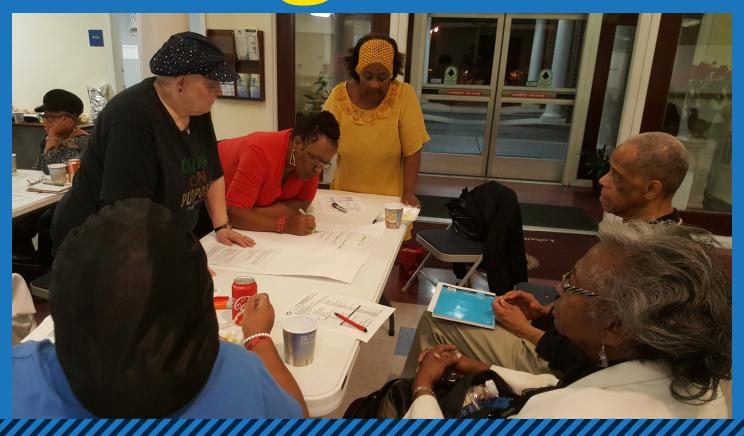

#### Thanks to the Generous Support of:

#### SOUTHMINSTER

Note: The Charlotte/Mecklenburg Quality of Life Explorer is the data source used for comparisons between Mecklenburg County and Lincoln Heights in this report.

# Challenge

Many senior adults in Charlotte struggle to maintain their mobility as they age, often resulting in social isolation and inability to meet daily needs. The gaps in Charlotte's transportation network and barriers to mobility for seniors, particularly for those seniors who rarely leave their homes, are not fully understood.

## Goals

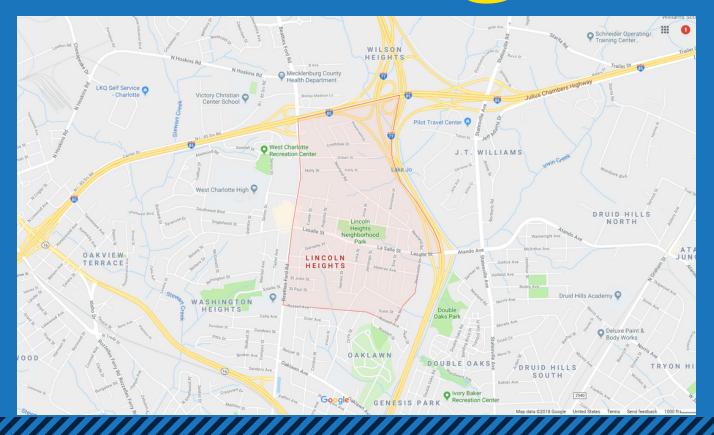

- (1) Identify specific mobility challenges that prevent Charlotte seniors from traveling to their desired daily destinations.
  - (2) Partner with four neighborhoods to envision how the mobility needs of their senior residents could be addressed.

# Approach

Sustain Charlotte engaged residents in four neighborhoods to evaluate a wide variety of factors that may limit senior mobility including health, safety, infrastructure, personal finances, knowledge of transportation options, comfort level using various transportation modes, and desire to maintain personal mobility. This is both a research and an action project. The project's approach and outcomes will be replicable in other Charlotte neighborhoods in the future.

# Lincoln Heights

Association and other residents in the community to identify specific senior mobility challenges through workshops and door-to-door surveying, envisioning an alternative scenario where all seniors have access to safe and convenient transportation.

## Transit

#### Transit fare is affordable.

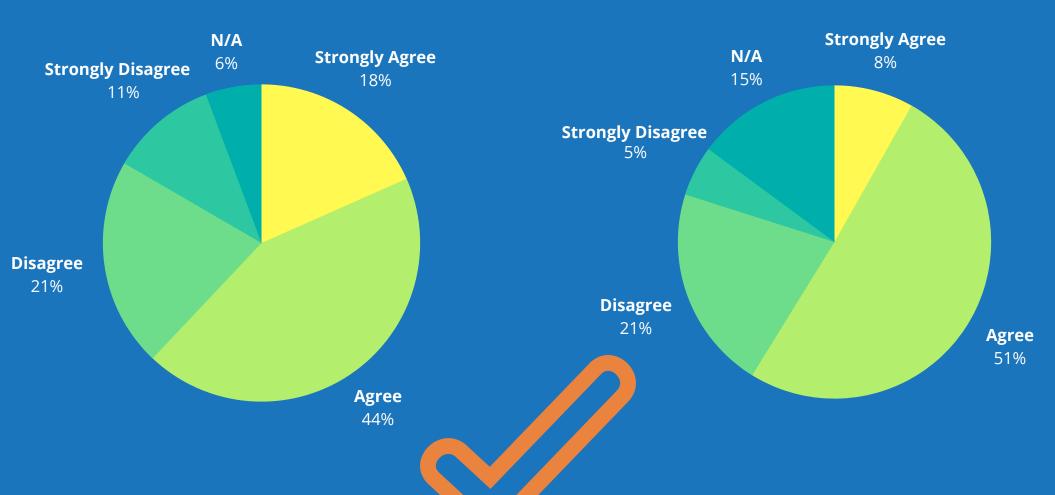

## I can easily purchase a senior transit pass.

## Transit

Public transit is provided where I live and want to go.

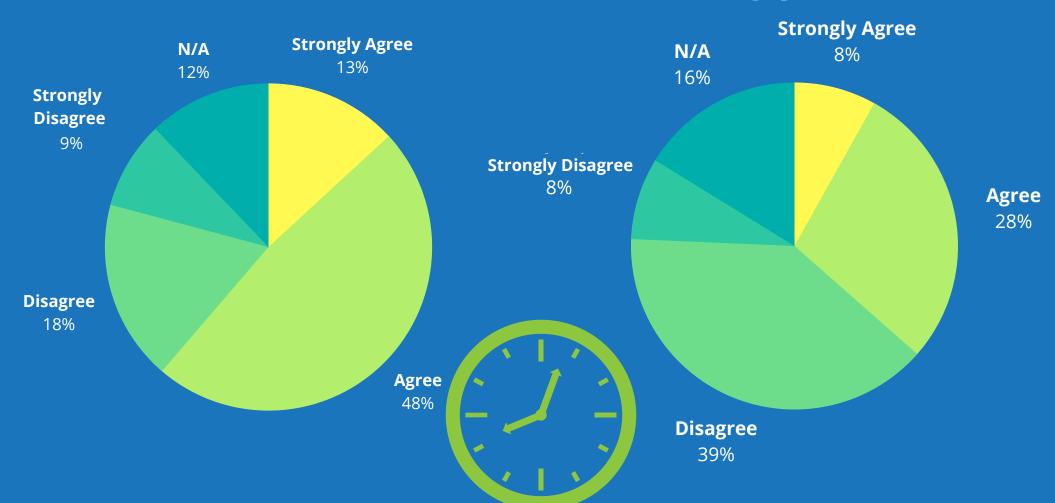

Public transit service is reliable.

### Transit

Public transit operates during the times I need.

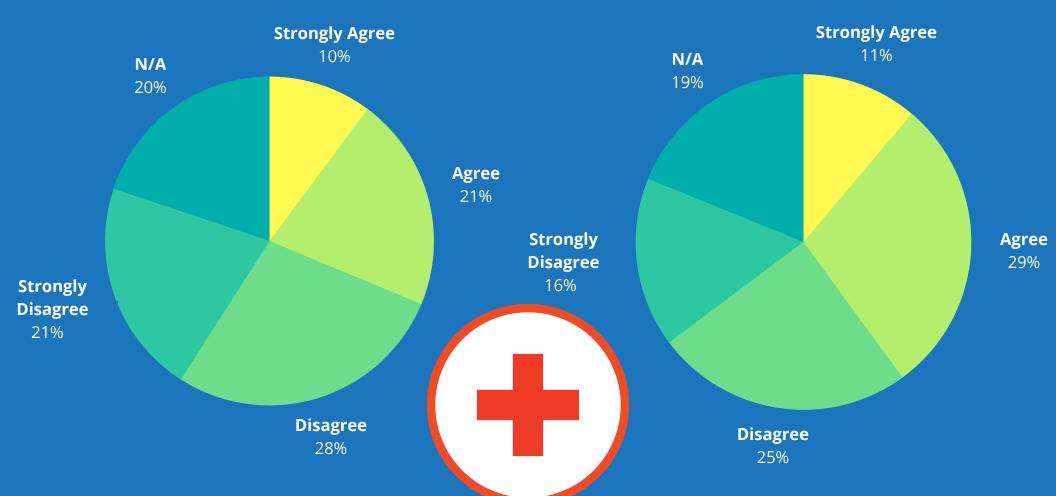

The travel time to my destination is reasonable when riding public transit.

### Transit

I have health reasons that prevent my use of public transit.

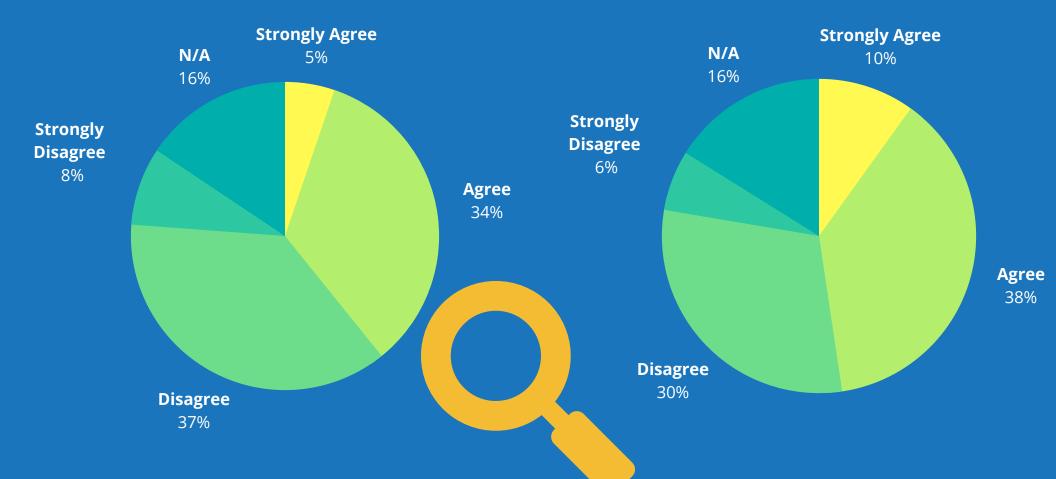

My difficulty in lifting or carrying packages prevents me from using public transit.

### Transit

The public transit system is easy to navigate.

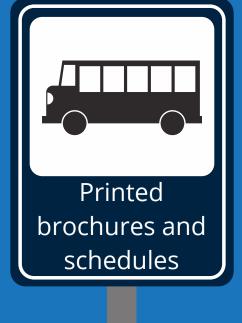

Information about public transit - fares, schedules, and routes - is easy to find and understand.

### Sidewalks

There are sidewalks that allow me to walk to my destination and/or transit stop.

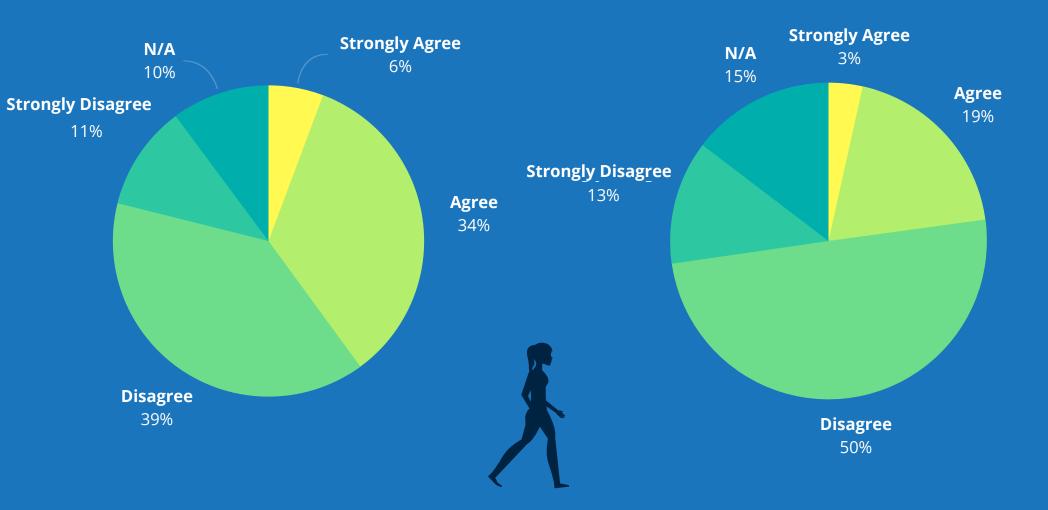

### The sidewalks are safe and easy to navigate.

### Sidewalks

The sidewalks are well maintained.

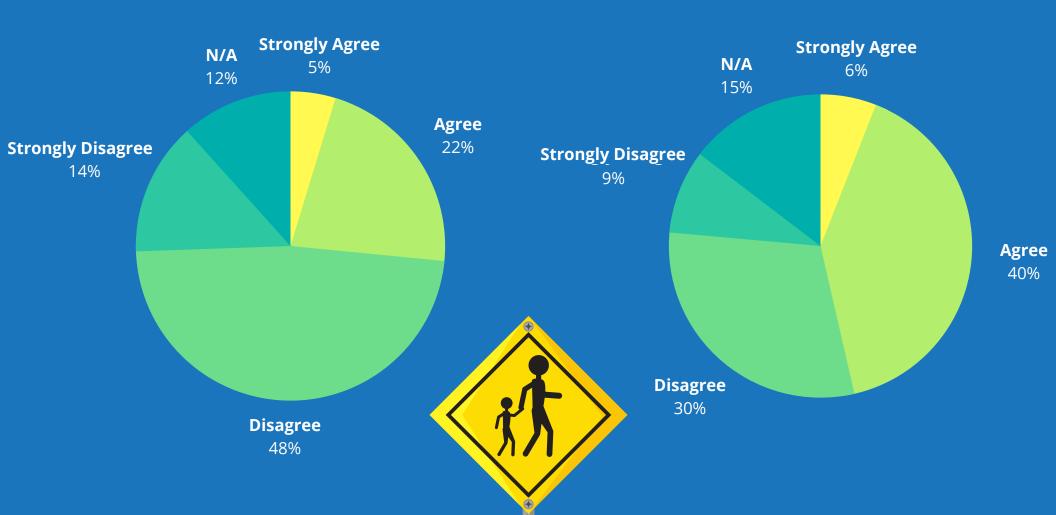

The sidewalks are well lit and I feel safe using them at night.

### Mobility

The street crossings are safe and convenient.

There are ramps and curb cuts that allow me to use the sidewalks.

### **I-77 Express Lanes**

Express lanes are scheduled to open on I-77 this year (2018). I-77 borders Lincoln Heights on its eastern side. The express lanes will run alongside the existing general purpose lanes. The price to use the lanes will be displayed on overhead electronic signs. As traffic levels and demand increase on the express lanes, the toll rate will increase. Once the traffic volume drops, the price goes down. After completion, vehicles with three or more occupants can still use the lane for free.

### **Lincoln Heights Storm Drainage Improvement Project**

The Lincoln Heights Storm Drainage Improvement Project will reduce street and structure flooding throughout the neighborhood. The project is located within a drainage area of approximately 225 acres. The City is spending an estimated \$5,600,000 and anticipates beginning construction in December 2020.

#### **TRANSIT PLANNING** 101

What constitutes a good route? Take a look at the following standards that CATS uses to help design optimal bus routes:

### **DENSITY**Are there jobs, housing, and activities within a reasonable distance of each potential bus stop?

Are people able to easily walk to and from the bus stop to access activities?

#### LINEARITY

Ooes the bus routing run in relatively straight lines?

#### PROXIMITY

Are bus stops and their respective destinations closely spaced?

### **Bus Network Redesign**

Envision My Ride is a planning initiative to redesign the current bus system. Through this initiative, the Charlotte Area Transit System (CATS) plans to study bus route structure and frequency to determine how to improve the system and better serve the Charlotte region.

CATS is leading extensive public outreach to best understand what is most important to riders. CATS will use this feedback to develop a plan for route and service adjustments.

CATS is hosting public meetings to discuss proposed changes to routing that will take place in October 2018 as a part of the Envision My Ride bus system redesign initiative.

#### **Key Considerations for Envision My Ride:**

- · Cross-town and suburb-to-suburb bus service
- Connections between different bus routes and between bus and light rail
- · Frequency of service
- More direct services

#### HIGHER FREQUENCIES

#### **EVERY ROUTE, EVERY DAY**

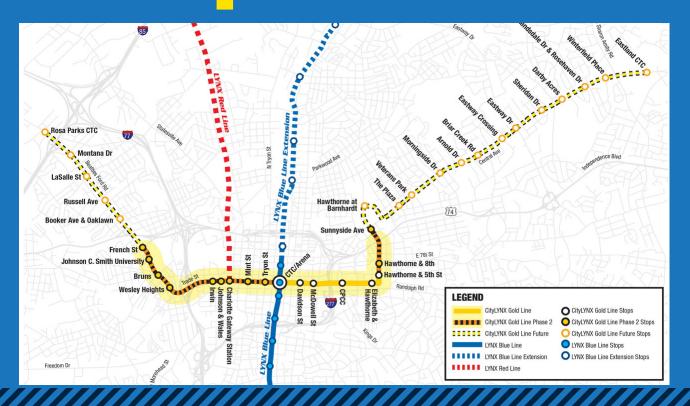

Every bus route would run every day, even on the weekend.

#### **EASIER TRANSFERS**

Advanced payment technology, real time trrival information, and improved grid pattern would make transfers would make transfers

#### **CityLYNX Gold Line**

Construction on CityLYNX Gold Line Phase 2 is underway, with major construction set to be completed by early 2020. This will lead to final testing and the opening of the four-mile streetcar system to riders in fall 2020. The long term plan is to extend the Gold Line along Beatties Ford Rd. to the Rosa Parks

Community Transit Center.

### **Pedestrian Friendly Budget Recently Approved by Charlotte City Council**

- \$4 million for the bicycle program to begin implementing the elements of a bicyclefriendly city as outlined in the Charlotte BIKES plan. This is the first stand-alone funding for the City's bicycle program since 2012, and the largest single-year allocation to the city's bicycle program ever.
- Doubling the funding for the pedestrian program from \$15 million to \$30 million for projects including sidewalks, street crossings, intersection improvements, and more.
- \$2 million to create a new Vision Zero program to work towards the elimination of traffic fatalities and serious injuries.

#### 

Issue	Solution
Seniors requested transit routes that were faster, more frequent, and provided access to a wider variety of destinations.	Fund Transit Expansion: The bus network redesign, known as Envision My Ride, is an effort to reduce trips times, increase the frequency of service, and improve connections between different bus routes and between bus and light rail.
Seniors reported safety concerns as a barrier preventing them from trying other modes of transportation including walking and biking. Seniors reported a lack of safe sidewalks, crosswalks, and bike lanes.	Funding for pedestrian and bike projects in this year's budget is a step in the right direction. Sustained funding at these levels or higher will be required to address ongoing concerns in this area.
Seniors expressed interest in working together to identify locations in their neighborhood for mobility improvements.	Neighborhood associations and community groups should conduct walking audits to evaluate specific locations in their neighborhood for mobility concerns.
Seniors proposed relevant neighborhood improvements but did not know how to apply for potential funding.	Neighborhood-based groups should access city resources for technical assistance in applying for Neighborhood Matching Grants.
Seniors reported a strong interest in trying different modes of transportation.	Based on available modes of transportation provided in each neighborhood, community groups can guide seniors in learning how to use them.
Seniors reported difficulty applying for Special Transportation Service (STS).	Medical providers, social service agencies, and CATS should work together to help seniors apply for STS.
Seniors reported difficulty operating payment kiosks at light rail stations.	Improved signage and education will be needed to guide transit riders through the ticket/pass purchasing process.
Seniors expressed a strong interest in continuing the work from this project and implementing solutions.	Sustain Charlotte will continue to meet with area seniors to address resident concerns and work toward solutions.

Sustain Charlotte will share this report with the Charlotte Area Transit System (CATS), Charlotte Department of Transportation (CDOT), and local elected officials in order to address areas of concern.
