

PACIFICA NOT INCLUDED

**Federal Budget 2019
creates an incentive to buy
electric vehicles.**

Friends,

The Liberal Federal 2019 Budget disappointed Canadians by providing subsidies to purchase vehicles built in foreign countries. There is no new money for investment in our auto sector or the supply chain to take advantage of new opportunities and establishes yet another corporate tax giveaway that does nothing to strengthen Canadian producers or supporting autoworkers.

Budget 2019 created a new vehicle purchase incentive of up to \$5000 for an electric battery or hydrogen fuel cell vehicle with a manufacturer's suggested retail price below \$45,000. The only Canadian built vehicle that could be considered, the Chrysler Pacifica Plug in Hybrid, is above that made-up price cap.

All the other vehicles available in the market are foreign built. Additionally, the program has an overall cap of \$300 million over three years for consumers while the government is providing businesses with an unlimited full tax write off for "zero emission" vehicles in the year that they are

purchased.

We demand the Liberal government immediately change this program to include all Canadian built plug in Hybrids, including the Chrysler Pacifica Plug-in Hybrid. We need to also demand that **ALL CANADIAN** built vehicles purchased by businesses will fall under the \$55,000 price cap for the capital cost allowance.

This is an outrageous insult to all businesses and workers in the Canadian auto sector.

The Trudeau Liberals talked of abandoning manufacturing and this budget demonstrates that they are doing exactly that, but **we can stop them.**

Please sign the petition and write the Finance Minister demanding the government include the Chrysler Pacifica Plug-in Hybrid in the vehicle purchase program so that

“It is absolutely stunning that the liberals are creating a subsidy that will encourage Canadians to buy foreign built vehicles while providing no new money for the auto sector to take advantage of significant new opportunities for the Ontario based supply chain by Fiat Chrysler’s (FCA) new investment in Detroit.”
