Third Shift Update

Our Union leadership met with the senior management of F.C.A. today and we are pleased to confirm that the company has decided to extend the life of the third shift until at least the end of 2019. We will continue to work on your behalf to do everything possible to strengthen our product lineup and achieve future investment that may ultimately save the third shift long- term.

We know full well the anxiety surrounding the third shift and the constant rumours that accompany that uncertainty. We believe that all of us being on the same page strengthens our solidarity and we will continue to pass on new and up to date information as we get it.

This is not a final solution, but every one of these extensions provides us more opportunities to work with the company to get a final resolve that maintains our 3rd shift and current work force for the future.

In Solidarity,

Your Unifor Local 444 Leadership
