

ELECTION ISSUE

ENERGY JOBS

The global energy transformation is irreversibly changing Alberta's economy.

Only one party leader has a Made in Alberta energy diversification plan - creating thousands of new value-added jobs and bringing new investment in upgrading to our province.

Alberta needs energy sector pragmatists, not yesterday's ideologues.

Election Day
April 16, 2019

In oil and gas, our biggest customer has become our biggest competitor, and that means one thing.

The old PC government approach to managing our resources doesn't cut it anymore. Alberta must prepare itself for the realities of new global energy markets.

NEXT GENERATION ENERGY JOBS

- *Invest in new pipeline infrastructure*
- *Diversify and upgrade in the oil and gas sector*
- *Create thousands of value-added jobs in the province*
- *Use our resource wealth as a springboard to the future.*

Despite the overwhelming evidence, Jason Kenney denies that the global energy transformation is happening. He misrepresents the problem, ignores the root causes of the global oil price collapse, and blames everything on the NDP.

We need a premier who can lead a changing Alberta.

ON APRIL 16

VOTE FOR A PREMIER THAT WILL FIGHT FOR WHAT MATTERS.
