**Everything keeping those we love safe & protecting health at work : laws, enforcement, unions, is under attack and being rowed backwards. Come and join us to fight back. #IWMD16**

Will we survive another five years?

In just one term, the Conservatives abandoned routine safety inspections - slashed the Health and Safety Executive's (HSE) budget by well over a third - grouped out HSE in commercial interests - killed off HSE's medical division - slashed the HSE's health and safety strategy - pulled the work of the government's watchdog - passed sick and injured workers out of compensation claims - made employers offshores pay go - removed key legal safety protections - sold business that health and safety was a burden they shouldn't be bothered by. If you think that's bad, wait to see what they have in store.

Deaths at work? Tell Cameron we won't take them lying down. #OHSforTories

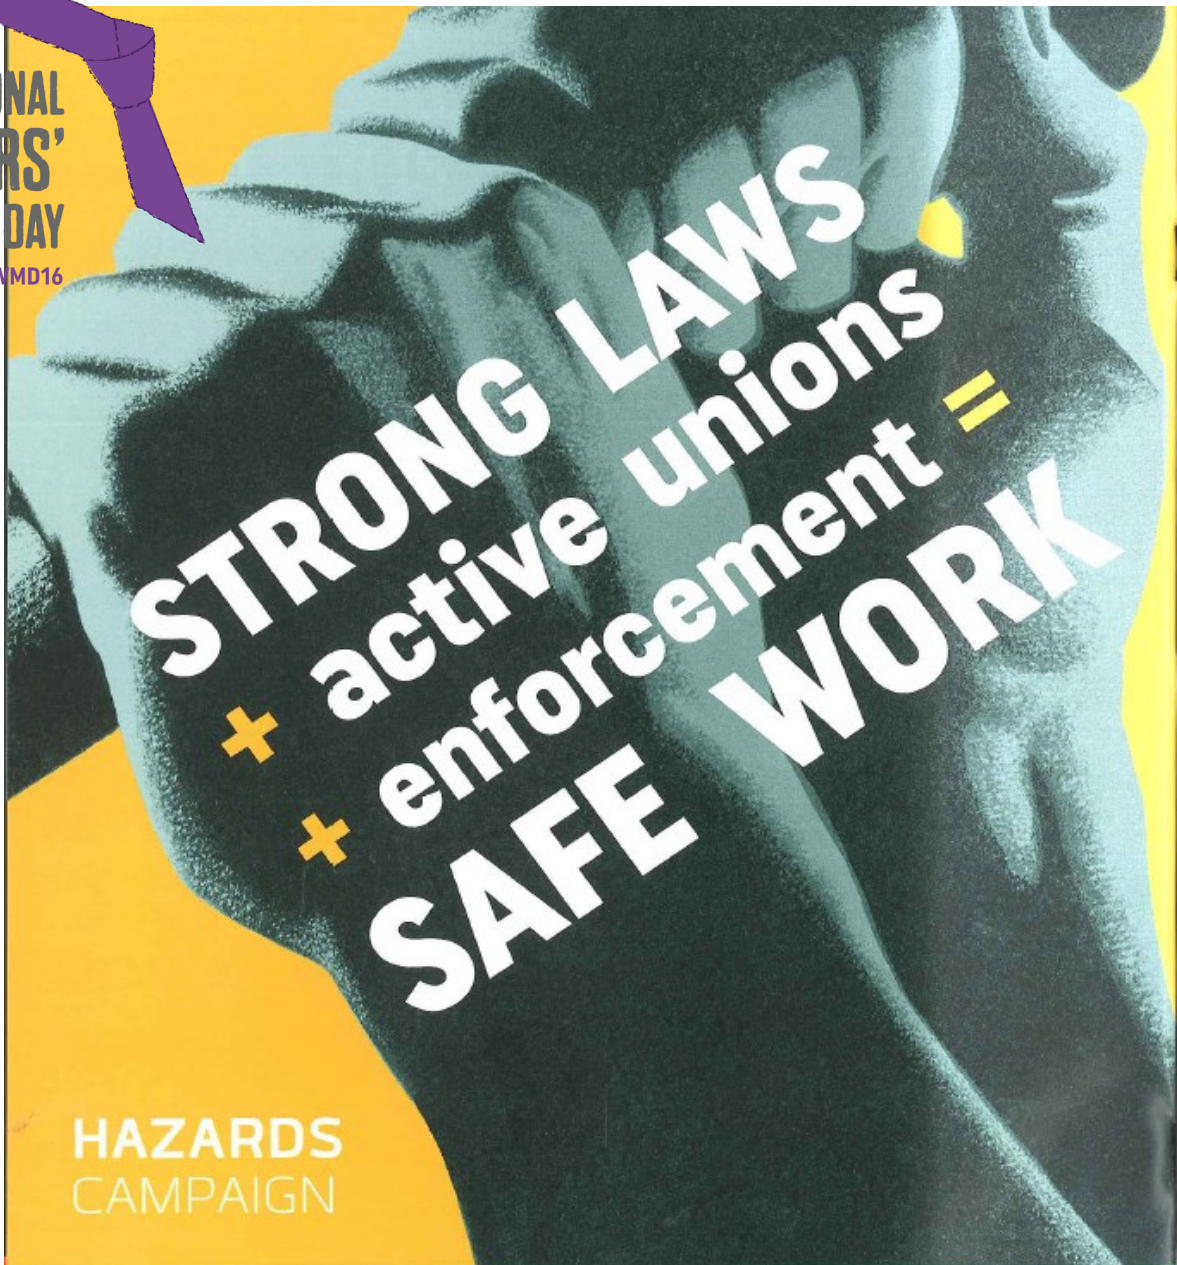

Hazards - fighting for your life [www.hazards.org](http://www.hazards.org)

On 28 April across the world, millions of workers, unions and families stand together. We remember all those killed at, and by, work and we fight for the living because no-one should ever die just for going to work. Almost all work deaths are due to employers' mismanagement.

Evidence shows strong laws, strong enforcement and strong unions make work safer. All now under government attack! Tory Government's over last 6 years have rolled back health and safety protections: cutting laws, slashing enforcement and attacking unions. We must fight together to stop this, for our own lives, our children & grandchildren's lives, or we will lose our hard-won health, safety & justice @ work.
