COVID-19 ANNOUNCEMENT

Know the difference between symptoms from smoke exposure and COVID-19

- Some symptoms, like dry cough, sore throat and difficulty breathing can be caused by both wildfire smoke exposure and COVID-19
- Learn about symptoms of COVID-19. Symptoms like fever or chills, muscle or body aches and diarrhea are not related to smoke exposure. If you have any of these symptoms, the **CDC COVID-19 Self-Checker** can help you determine whether you need further assessment or testing for COVID-19. If you have questions after using the CDC COVID-19 Self-Checker, contact a healthcare provider.
- If you have severe symptoms, like difficulty breathing or chest pain, immediately call 911 or the nearest emergency facility.

STATEWIDE

- **FEMA Housing Assistance**

The first step toward getting housing assistance is to register with the Federal Emergency Management Agency (FEMA).

- **USDA Supplemental Nutrition Assistance**

The Disaster Supplemental Nutrition Assistance Program (D-SNAP) may help you replace food lost in a disaster or help you apply for D-SNAP benefits online.
