

GREEN PROFESSIONAL BUILDING SKILLS TRAINING SESSIONS (GPRO)

What is GPRO?

GPRO is a certificate program developed by Urban Green Council that teaches the people who build, renovate, and maintain buildings the tools to integrate high-performance construction and maintenance practices into their everyday work. The holistic approach to sustainability training combined with expert advice and the latest adult learning techniques—has made GPRO an education trailblazer for building trades and operators across the country.

What will you learn?

Part 1:

Fundamentals of Building Green

- Overview of green building strategies
- Economic and health benefits of a green building
- Causes and impacts of a changing climate on buildings
- Transitioning to sustainable construction practices
- Complying with green codes and standards
- Understanding LEED
- The importance of building commissioning

Part 2:

Operations & Maintenance

- Take a systemic approach to operating and maintaining your building
- Evaluate the performance of your building
- Describe at least three immediately actionable measures that will improve the health, energy, or water efficiency of your building and the next steps needed to achieve them
- Explain the costs and benefits of those measures

GPRO Exam and Credential

Participants who successfully complete all GPRO trainings and pass the multiple-choice exam become GPRO certificate holders, a credential that's the top choice of forward-thinking organizations and employers in the country.

Presented By:

Robert Carr, LEED AP O+M, MA, FitWel Ambassador
Education & Programs Manager, San Diego Green Building Council
