

# Equality is union business.

99% of the work we do as union members is about fighting for our right to decent, safe, well-paying work. But that's one fight in a larger battle to build a just and fair society for everyone.

We can't build a just and fair society for everyone while our lesbian, gay, bisexual, transgender and intersex (LGBTI) workmates are treated differently to other workers. They have the same right to happiness as every other union member and the same right to have their loving, committed relationships treated equally.

**We stand up and fight for all workers, because equality is union business.**

**WE ARE UNION**
