Dear Senator,

I write to you to raise the urgent issue of Tony Abbott's bill, which attacks workers' rights and conditions. The amendments to the Fair Work Act will force through changes that will make it easier for my pay and conditions to be cut. This means a return to WorkChoices style individual agreements.

The government is also trying to make it harder for me to get representation if I experience problems in the workplace.

**These changes are unfair.** I know that your vote will be vital in deciding whether they happen or not.

I call on you to publicly declare that you will not support a bill which reduces the rights of Victorian workers.

I'm asking you to stand up for me against these unfair attacks.

Regards,
