Secretary Williams,

I request to remove my name and signature from consideration for Initiative #97. I've since learned that this measure will ultimately ban energy development in Colorado. Following a report by the state's regulators showing that 85% of state and private land would be off-limits for oil and natural gas development, I cannot support this initiative. It would jeopardize over 100,000 Colorado jobs, \$31 billion in economic activity and millions of dollars in public services.

I elect not to lend my name to this measure and no longer support having it appear on the ballot.

Thank you.
