

## San Gabriel River Confluence with Cattle Canyon Improvements Project

State Clearinghouse #2016101039

**To:** Stakeholders of the Draft Environmental Impact Statement/Report (DEIS/EIR)  
**From:** Jeffrey Vail, Forest Supervisor of the Angeles National Forest, USDA Forest Service  
Mark Stanley, Executive Officer, Watershed Conservation Authority  
**Subject:** Notice of Availability, Draft EIS/EIR for the Proposed San Gabriel River Confluence with Cattle Canyon Improvements Project  
**Date:** November 7, 2017

The Angeles National Forest (ANF), as the Lead Agency under the National Environmental Policy Act, and the Watershed Conservation Authority (WCA), as the Lead Agency under the California Environmental Quality Act, are seeking public comment on a joint Draft Environmental Impact Statement/Environmental Impact Report (Draft EIS/EIR) for consideration of the San Gabriel River Confluence with Cattle Canyon Improvements Project.

**Proposed Action/Project.** The proposed action/project would develop new management strategies and enhancements to protect and restore the existing multi-use areas for public enjoyment along the East Fork San Gabriel River (EFSGR) and within the 198-acre project site. Proposed enhancements include the development of new, pedestrian trails, river access points, and upgrades to existing facilities, improvements to paved and unpaved roadways, and restoration of riparian and upland vegetation communities. The proposed action/project would aim to shift and concentrate recreational use to certain areas to minimize adverse effects overall, promote stewardship of public lands, improve riparian habitat conditions and enhance stream habitat conditions. The Draft EIS/EIR describes the purpose and need, proposed actions and evaluates the environmental impacts associated with construction and operation. The Draft EIS/EIR has determined that the proposed action would not result in any unavoidable significant impacts. Alternatives evaluated include the following:

- *Alternative 1: Proposed Action.*
- *Alternative 2: No Action/No Project Alternative.* This alternative would not implement roadway and recreational improvements. Existing use of recreational facilities and both authorized and unauthorized trail access would be expected to continue.
