

It's Time For A Wisconsin That Works For All of Us!

Politics as usual is not working for most people. Over 60% of Americans want a new major party. Instead of waiting for the political establishment to save us, it's time to take our democracy into our own hands with a party for the people.

We've had enough of government for wealthy elites. We need a Wisconsin that works for all of us. Unlike the corporate-funded establishment parties, the Green Party puts **people and planet over corporate profits**.

Vote Green and here are some of the first things we will deliver:

A Green New Deal to provide jobs to all who need them, through public investment in clean renewable energy, public transportation, regenerative agriculture and conservation.

A \$15/hour minimum wage. No one who works full time should be unable to support their family. Restore and expand workers' rights.

Investment in Wisconsin students, start-ups and workers, not foreign corporations. End corporate welfare like the Foxconn giveaway. Invest in our people, not big campaign donors.

A single-payer healthcare system to ensure everyone in our state has access to quality healthcare. Your health is more important than profits for insurance company CEOs.

Fully-funded quality public education from kindergarten through university. Restore our public schools. Make in-state tuition free for public universities. Invest in our future.

Deep criminal justice reform to tackle the shameful racial disparities in our state. Enact community control of police. Legalize cannabis and tackle drug abuse as a public health issue.

A publicly-owned state Bank of Wisconsin with blockchain technology to keep our money in Wisconsin, not Wall Street. Audit state government to see where our money is being spent.

Election reform for real democracy. Ranked choice voting to prevent "vote-splitting". Proportional representation to make all votes matter. Audits to ensure every vote is counted.
