WE DEMAND SAFE LEARNING CONDITIONS!

As proud educators, parents, families and community members of the School District of Philadelphia, we are outraged that city and district leaders continue to sit by while school buildings poison our children— with toxic lead that causes permanent cognitive damage as well as temperatures and pests that trigger asthma. As educators who care deeply for our students, we demand lead remediation in all schools that have toxic lead—not just the 40 schools the District has selected. In addition, we demand robust pest control and air conditioners in every learning space in order to alleviate asthma, which is a widespread cause of suffering and absenteeism among Philly children. Ending the ten-year tax abatement for the wealthy and requiring big universities and mega non-profits to pay their fair share through PILOTS will fund the safe learning conditions that Philly students deserve.
