
Is it Trash or Treasure? Learn how to create DIY Obscured Art using old unused materials at home.

Lesson: [Visual Art with Math Component](#)

All DIY Visual Art Activity Sheets are available for parents to work with their child at home on various creative projects that are easily accessible with or without the use of technology.

YOUR CHOICE!

Written Task: Pencil & Paper for Lesson Notes to complete an Analysis of How Obscured Art and Entropy can be used to tell a Story.

Performance Task: Empty Cereal Box/ Old Shoe Box, 90 Degree Angle Ruler, Scissors, Glue, Crayons and/or Paint

OFFICIAL
MyClass

GETTING STARTED

1. Write a Short Story that you want to showcase in your Art Work
2. Select an Old Cardboard Box (i.e. Shoe Box, Cereal Box)
3. Trace and/or Sketch an Outline of a Shape using your Ruler (i.e. Create a Square for the base of a House)
4. Color your shapes based on your choice
5. Cut your shapes out to form base for assembly and save all scrap pieces
6. Identify another Cardboard Box that you are willing to use as the foundation for your building structure if needed (it's not necessary to complete the activity)
7. Glue all painted/colored pieces together
8. Cross check to make sure your story is matching pieces
9. Repeat the process if you are in need of creating characters or other pieces for your story
10. Reflect on how many Obscured Items were required to demonstrate Entropy in your story

DO YOU LOVE WHAT YOU'VE CREATED!?

Once you love what you've created then take pictures!

- Share your pictures with others (you can also use your cell phone to record video for future voice overs). Ask your friends and family for feedback.
- Consider ways to future develop your story and transform it into an actual Script or Storyboard
- Observe your work and think about the items around the house that can be used as a new found treasure in your Obscured Art

Parent Corner: Inspire & Share your DIY Obscured Art with #MsCclassTV
