irections: Continue solving problems using equations and algebraic thinking today. Show your work in the ace provided.

1. Here is a graph that shows some values for the number of cups of sugar, s, required to make x batches of brownies.

a. Complete the table so that the pair of numbers in each column represents the coordinates of a point on the graph.

x	1	2	3	4	5	6	7
s							

b. What does the point $(8, 4)$ mean in terms of the amount of sugar and number of batches of brownies?

c. Write an equation that shows the amount of sugar in terms of the number of batches.
