

How to Make a Bubble Snake

Materials:

- Plastic water or soda bottle
 - Scissors
 - Dish soap
 - Water
 - Sock
 - Bowl
- Food coloring (optional)

Directions:

- Have an adult cut off the bottom of the plastic bottle with scissors
 - Cover the bottom with a sock (make sure it fits snugly)
- Mix one big squirt of soap with enough water to cover the bottom of the bowl (mix in food coloring if wanted)
- Dip the big end of the water bottle (the end covered by the sock) into the water and soap mixture
- Blow hard through the other small end of the water bottle (where you would normally drink) - make sure not to suck in or you will get soap in your mouth!
 - Enjoy your bubble snakes!
