The Ten Principles of Thinking Math and the Standards for Mathematical Practice are linked, and attention paid to how concepts and skills develop. Using geometry as a starting point, participants explore ways to help students understand linear functions and rate of change with emphasis on linking various ways of seeing the same problem. Practices such as reasoning, constructing viable arguments, precision and looking for mathematical structure combine with Principles of Thinking Mathematics such as helping students visualize problems, requiring them to discuss and justify their mathematical thinking, using situational problems to connect mathematics to life, and balancing conceptual and procedural knowledge to develop such understanding.

Financial Literacy Fridays have been developed with the 4Cs in mind: collaboration, curation, creation and content:

- Collaboration: Educators have multiple opportunities to collaborate.
- Curation: Educators complete games and Next Generation Personal Finance (NGPF) Scavenger Hunts which are focused on finding resources that they can use in their classrooms.
- Creation: What could be a better use of PD time than to have teachers walk away with an activity they can use with their class? In these sessions, educators identify NGPF activities to supplement their existing curriculum and then find additional resources to prepare the students for the activity.
- Content: Educators complete a pre-survey to identify content areas they want a “deeper dive” in.

**Participants will receive 20 PLU's.**
