

Dear Neighbors,

Your home or business is within a few hundred feet of a proposed site for a 4/5G “small” cell facility/pole that will constantly emit high levels of microwave radiation that have been shown to be hazardous. They are doing this because it costs less than installing fiber optics.

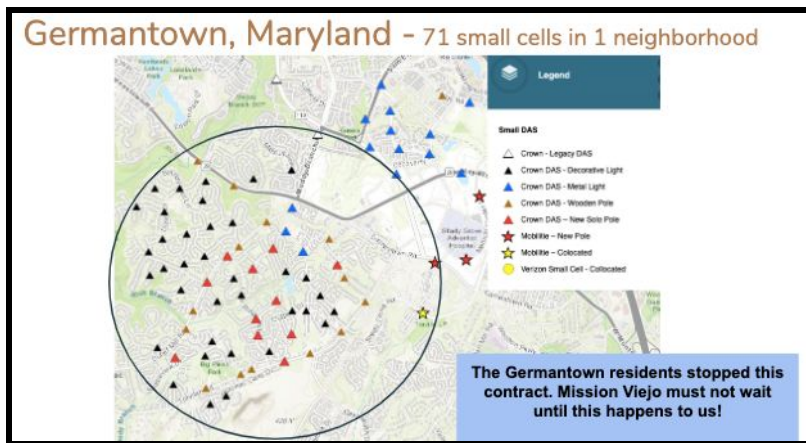

Monday, March 9, 2020, our Mission Viejo Planning Commissioners will vote on 2 “small” cell facilities. AT&T has proposed 15 additional structures throughout Mission Viejo. *AT&T, T Mobile, and Verizon all want their own poles.* The telecom companies claim that they will need these small cells for 5G every 500-1000 feet, so our city is facing about **3000** 4/5G poles 16-30 feet from our homes.

If we do not show up to council and speak up we face:

- Ugly, 1 X 30-foot poles erected outside our schools, businesses, churches, parks, businesses and homes which can lower property values by 30 percent.
- Constant radio frequency noise emitting 30 feet from our schools, businesses, churches, parks, and homes that we cannot turn off. Studies show serious harm to birds and bees from these frequencies.
- Health implications such as headaches, fatigue, confusion, and cancer have been reported from schools, firehouses and residential areas where 4/5G has been installed.
- Increased risk of hackers infiltrating our privacy and security through our home or business Smart security systems, laptops and phones.
- Cities like Petaluma, Encinitas, and Mill Valley have restricted installation in residential areas successfully and have not been sued. We can do this with your support!
-

The Telecom companies say 5G is safe according to the FCC “standards” but those guidelines were made in 1991 and were not for 4G or 5G and did not include health or environmental impact.

We need to show the Commissioners that we care and will support their decision to deny the application, or pause approval until lawsuits against the FCC regarding 4/5G are completed. Please come and speak up FOR underground public fiber optics! We will have talking points. Visit EHTrust.org, or mystreetmychoice.com, and scientists4wiredtech.org to learn more. Join momsacrossamerica.org email list for calls.

Join us! Monday, March 9, 2020, at 6:30 pm at the Mission Viejo City Council
200 Civic Ctr, Mission Viejo, CA 92691. It is **CRUCIAL** that we fill the council!

Please photocopy this flyer and pass it out to all your neighbors!

RSVP on Facebook at Stop 5G Mission Viejo.
