This is an example of a budget that might be submitted by an applicant planning to attend a professional association conference related to their development goals that would be funded by a combination of a grant from YNPN Boston and a scholarship from the professional association.

In this example, the total amount requested by the applicant would be applied to the hotel stay for the applicant to attend the conference. It appears that the scholarship from the professional association is covering the cost of the conference registration and a portion of the hotel and travel expenses.
